

*Stay focused on the project,
lease the skills you need*

*We provide skilled staff for
construction and landscaping projects*

Machine operators • Pipe layers • Workmen • Landscape gardeners

The right people for any construction or landscaping project

TMN Crew employs some of Denmark's most skilled machine operators, pipe layers, workmen and landscape gardeners. We take time to familiarise ourselves fully with each individual assignment and hand-pick the best people for the project. You then have the option of adapting your labour force based on your day-to-day needs.

Short and longer term projects

We take on both short and longer term projects and our customers are typically contractors, machinery suppliers, other businesses and local councils.

We recruit skilled staff for construction and landscaping projects across Denmark.

90% of our employees work for us full time, including some of Denmark's top machine operators, pipe layers, workmen and landscape gardeners.

Hands-on experience

TMN Crew knows how things work at Danish construction sites. We have hands-on experience and we are more than just a temp agency. We don't send random, unqualified people to perform difficult tasks.

Better cashflow for each project

The work of contractors and landscape gardeners is often seasonal, which results in peaks of activity where it can be necessary to increase the workforce. With TMN Crew you always have access to a flexible team with the right skills, helping you to optimise your workforce for each project.

It makes financial sense to have the option to add qualified staff without having to employ more staff on a fixed basis, with all the charges that that would entail in the form of sick and holiday pay and training expenses.

Generous payment terms

Overall, working with TMN Crew helps you achieve a better cashflow throughout the process. Furthermore, we offer a generous payment term. You also save time and resources that would otherwise have been spent on recruitment.

Access to a professional labour force

As our customer, you are given access to a professional labour force that you can adjust to suit your needs as they change from day to day. This flexibility means increased profitability for your organisation and allows you to tender for major assignments at short notice.

Nationwide service

Having enjoyed a massive success on Zealand in the past couple of years, TMN Crew has now opened a department in Denmark's Triangle Region to meet the demand for skilled labour from the many extensive construction projects in Jutland and on Funen. TMN Crews skilled machine operators, workmen and pipe layers work nationwide.
